WORK EXPERIENCE

Frontend Developer, Vendosmart (ProqSmart)

12/2025 – 03/2026

Bengaluru

- Architected an enterprise B2B procurement platform using Next.js, React, and TypeScript in a Turborepo monorepo; designed modular packages for API clients, state management, hooks, and shared UI components to ensure scalability and reusability across multiple portals.
- Built an end-to-end procurement workflow — RFQ creation and management, supplier quotation submission, bid comparison with visual heatmap analysis, contract generation, order fulfillment, and multi-level approval routing.
- Implemented real-time collaboration via WebSocket for live buyer-supplier messaging and instant bid updates; integrated with Zustand for optimistic UI updates and reliable state synchronization.
- Engineered secure dual-portal authentication with Firebase, isolated storage contexts for buyer/supplier workflows, an API proxy pattern to protect backend endpoints, and automated JWT token injection via request interceptors.
- Developed a type-safe API service layer using TypeScript generics and auto-generated interfaces; created reusable CRUD abstractions with query builders and composable filters across all DocTypes.
- Built a Mantine-based design system using Storybook — including inline-editable data tables, document preview modules, dynamic form builders, and specialized procurement components to maintain UX consistency.
- Leveraged Cursor and Claude CLI (Claude Code) throughout development to accelerate feature delivery, debug complex TypeScript, and maintain code quality across the monorepo.

Software Engineer, mFilterIt

02/2025 – 08/2025

Noida

- Developed the Intellplus Dashboard from scratch using React.js to detect online fraud, manipulation, and emerging risk trends; integrated multiple internal and external data sources via robust APIs for seamless data flow.
- Engineered responsive, accessible web apps with Tailwind CSS, Bootstrap, and shadcn/ui; optimized performance via lazy loading and code-splitting for high-traffic environments.
- Collaborated cross-functionally to align UI/UX design with business goals; leveraged component-driven development and reusable UI libraries to improve delivery speed and design consistency.

PROJECTS

Higgsfield — AI Avatar & Video Generation Platform [GitHub](#)

- Built a full-stack AI-powered platform using Next.js (frontend) and Bun + Express (backend) in a Turborepo monorepo, featuring avatar creation, AI-driven video generation, credits management, and media workflow integrations.
- Implemented user authentication, session handling, result tracking, and containerized the full stack with Docker Compose; developed a shared UI component library across Turborepo packages.
- Used Cursor and Claude CLI as AI-assisted development tools to accelerate scaffolding, debug Prisma integrations, and iterate rapidly on AI media generation pipelines.

Online E-Learning Platform [Live Demo](#) [GitHub](#)

- Built a full-stack e-learning platform with React.js, Node.js, Express.js, and MongoDB; implemented JWT authentication with role-based access control for students and instructors.
- Integrated Cloudinary for media storage, React Query and React Hook Form for smooth UX; developed course creation, video lessons, progress tracking, and review features.

SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, HTML5, CSS3

Frameworks & Libraries: React.js, Next.js, Node.js, Express.js, FastAPI, Redux, Zustand, Bun

UI & Styling: Tailwind CSS, Bootstrap, Mantine, shadcn/ui, Storybook, Responsive Web Design

Databases & Tools: PostgreSQL, MySQL, MongoDB, RESTful APIs, Git & GitHub, Firebase, Vercel, Turborepo, Docker, Prisma

AI Developer Tools: Cursor, Claude CLI (Claude Code)

EDUCATION

Full Stack Web Development · Masai School

12/2023 – 01/2025

B.Tech in Civil Engineering · RBIENT, Hoshiarpur, Punjab

08/2013 – 07/2017
